CSS Rule Set

The whole structure is called a ruleset. (The term ruleset is often referred to as just rule.) Note the names of the individual parts:

Selecting Multiple Elements

```
p, li, h1 {  
  color: red;  
}
```

you can select many elements by using coma(,) between them 

Adding Custom Font Link

```
<link href="https://fonts.googleapis.com/css?family=Open+Sans" rel="stylesheet">
```

Using Link tag you can import font in HTML

Padding, Border, Margin

Padding: the space around the content.

Border: the solid line that is just outside the padding.

Margin: the space around the outside of the border.

Hover Effects

```
.entry h2{  
    font-size:36px;  
    color:#000;  
    font-weight:800;  
}  
  
.entry h2:hover{  
    color:#f00;  
}
```

On taking the cursor on the element the h2 color will change to #f00 from #000;
